

PAWEL SLUGOCKI

Back-End focused Full Stack .NET Developer

+48 793 385 265
slugocki.pawel@gmail.com
www.slugocki.dev
Wroclaw, Poland

Gained engineering and finance degree that helped to operate in the financial world (at personal and business level). Started as a junior payroll accounting analyst to learn accounting and business acumen, ended as payroll accounting specialist, who was responsible for GL payroll accounts and payroll cost/audit queries needed by Business/Controllershship. After 2 years, shifted towards Business Process Automation using VBA and Business Intelligence with PowerBi to help automate payroll processes which elevated KPI metrics.

Currently, focused on Web Applications engineering.

WORK EXPERIENCES

Senior Payroll Accounting Analyst

Hewlett-Packard Enterprise | 2015 - 2020

This role has two main functions - bookkeeping of payroll General Ledger accounts and analysis of payroll activities. Payroll accountant should record all payroll related activities in the company books (either via payroll systems- like Global View or manually- using SAP).

Also, Payroll Analyst cooperate closely with Payroll Operation teams/Controllors/internal and external Auditors/Business Analysts to provide meaningful insights about payroll financial transactions.

Process Automation Responsibilities

- Developing desktop automation VBA applications for payroll accounting team (local and global level)
- Cooperating with Project Managers to develop PowerBi dashboards / VBA automation applications
- Managing and adjusting all automated tools to ever changing business environment (SAP S4 Hana transition/audit requirements/local law changes)

Accounting Responsibilities

- Bookkeeping of payroll GL accounts and all related activities
- Creating and adjusting processes to ever changing local regulations
- Working with external and internal audits- providing data, explanations
- Cooperating with Business to explain movements on payroll accounts
- Testing SAP S4 Hana implementation
- Cooperating with ADP and local payroll teams to implement Global View system

CERTIFICATES

- Power BI Desktop & On-Line issued by Altkom Academia
- VBA advanced course issued by HintMine
- MS Excel – Reporting and Data Analysis Automation by using VBA issued by Altkom Academia
- Project management for managers issued by Altkom Academia
- Accounting Certificate (I and II) issued by Stowarzyszenie Ksiegowych w Polsce (SKWP)
- Visual Basic for Applications (VBA) in Excel – introduction to programming issued by NobleProg
- Basics of Accounting (I and II) by OdITK
- Kickboxing level 5 certificate issued by PZKB
- First Aid course issued by Red Cross

SKILLS

Technical

HTML / CSS / Bootstrap
C#
.NET Core MVC
.NET Core WEB API
.NET6 Blazor
Entity Framework / Dapper
GIT
JavaScript / Typescript
Relational Databases- SQL, PostgreSQL, MySQL
Object-Oriented Design
Design and implement database (Code First and Database First)
Node.js

Professional

Effective communication
Team player
Strong problem solver
Good time management

EDUCATION

Master of Engineering in Environment Protection

Wroclaw University of Science and Technology
Faculty of Environmental Engineering
2009 - 2014

Postgraduate Studies in Finance and Accounting

Wroclaw University of Economics
2014 - 2015

PROJECTS

Bug Tracker

The Bug Tracker is an issue tracking app, where users can create issue tickets.

Project Managers assign a person to each tickets, so they can be resolved by competent stuff. Tickets have comments/attachment functionality and history track record. The application supports multiply companies if needed.

The Dating App

The Dating App is a social application. It allows users to upload their description abd photos. Also, it provides communication capabilities- either via Inbox/Outbox messages or real time chat (using SignalR).

Users can be searched via filter conditions. Also, the app provide like/dislike functionality. Photos are stored in third party vendor cloud (Cloudinary).

Personal Blog

The Blog is a .NET MVC application that allows me to write technology related posts. The idea was to write down my knowledge to have notes at hand. Additionally, if anyone will be able to profit from my notes, it would be great.

The app itself uses Postgresql database alongside Entity Framework. It implements Authentication/Authorization mechanism with custom user roles. Also, each post has comments section.

Administrator is responsible for managing user roles. Moderator is responsible for comments moderation.

The Movie Store

The Movie Store application uses third-party API to connect to and consume data from The Movie Database (<https://www.themoviedb.org/>). The received data is displayed to the user as a variation of cinema schedule- movies are grouped in different categories (e.g. Now Playing, Upcoming etc.). User is able to view specific movie details, along with its crew and cast. Details for crew and cast are also available.

The Movie Store is a .NET MVC application tah uses Postgresql database alongside Entity Framework.
